| ${ }^{3}$ Determine your capital gain bracket(s) by adding your net long-term capital gains and/or qualified dividends to your other taxable income net of deductions. Multiple tax rates may apply since rates are progressive. |  |  |  |

For example, assume a joint filer has net taxable income of $\$ 100,000$ which includes $\$ 20,000$ in net long-term capital gain. The first $\$ 14,050$ of the gain falls within the $0 \%$ rate threshold of $\$ 94,050$ and will be taxed at 0\%; while the remaining $\$ 5,950$ of long-term capital gain is above the $\$ 94,050$ threshold and will be taxed at $15 \%$.

| Short-term capital gain <br> rate (one year or less) | Taxed at ordinary income tax rate. |
| :--- | :--- |
| Dividends | Qualified dividends are taxed at the long-term capital <br> gain rates. Nonqualified dividends are taxed at ordinary <br> income tax rates. |

Higher rates apply to collectibles and unrecaptured $\S 1250$ gain. Consult your tax advisor about how they apply to your situation.

## Netting capital gains and losses
